

Older Versions

I've made older versions of my personal website. Unlike this one, they contained JavaScript.

2016: zetlen.github.io

Built with [Next.js version 1](#), when Vercel was still called **ZEIT**. If they ever turn off cdn.zeit.co, this site will go peacefully into the blank whiteout of broken client-rendered webpages everywhere.

2015: jameszetlen.com

Build with [harpjs](#), SCSS, and a bunch of vanilla JS, when I was playing with canvas drawing; as always, I preferred to use the native API until it either exhausted or bored me before moving on to higher-level libraries.
